

DON'T COMPROMISE YOUR VISION

You're connected—to your friends, to your world, and to your work. From computers to TV screens to mobile phones, your eyes are constantly at risk for eye strain and exposure to Harmful Blue Light.² Help protect your eyes so you can focus on what matters to you.

² Eyezen lenses filter at least 20% of Harmful Blue Light, which is the high energy wavelengths found between 415-455 nm on the light spectrum (blue-violet light).

EYEZEN® LENSES ARE IDEAL FOR SINGLE-VISION WEARERS

Eyezen lenses are an enhanced, everyday pair of single-vision lenses that are a more complete solution. They are providing sharper vision addressing modern vision problems such as digital eye strain and exposure to Harmful Blue Light.²

KEY BENEFITS:

DEFENSE AGAINST DIGITAL EYE STRAIN¹

SHARPER VISION

HARMFUL BLUE LIGHT PROTECTION²

DIGITAL EYE STRAIN

Digital eye strain¹ is defined as the **physical eye discomfort** felt after two or more hours in front of a digital screen. It originates from the overexertion of certain muscles that help your eyes focus.

HARMFUL BLUE LIGHT

Blue light can be good or bad. Harmful Blue Light is all around you due to the increasing use of devices and new lighting technologies inside and sunlight outside. *Eyezen* lenses have embedded technology that can differentiate between the two, helping filter out Harmful Blue Light and letting in the Beneficial Blue Light that helps regulate mood and sleep cycles.

¹ Rosenfield M, Hue JE, Huang RR, Bababekova Y. (2012); Rosenfield (2016). *Eyezen+* designs 1, 2, 3, and 4 contain accommodative relief.

² *Eyezen* lenses filter at least 20% of Harmful Blue Light, which is the high energy wavelengths found between 415-455 nm on the light spectrum (blue-violet light).
